CITY AND COUNTY OFFICIAL PAPER

The petty jealousies of mean minds will crop out. They cannot understand that it is possible to have the good of the public at heart, and not a selfish personal interest.

The Yuma Sentinel has passed the 26th milestone of its journalistic career, and to Col. Dorrington who has always been at the helm battling for Yuma and the territory, we extend our best wishes for continued prosperity.

Well, we've got lots of grub, plenty of wood, a good, warm shuck, a friend across the street with a well filled jug, and surely we feel as though we can get along. What more does a man want in these McKinley "accursed" times?—Rock Creek Record.

Copper is still advancing. Quite a number of inquiries are being made for properties containing fair percent age of the metal, and doubtless there will be many claims bonded and sold this winter. Arizona is rich in copper and will be greatly benefitted in the advanced price of the metal.

From February 1, 1896, to November 1, 1896, there were coined at the United States mint 16,262,922 standard silver dollars from the silver bullion on hand purchased under the act of July 14, 1890. The seigniorage upon this amount was \$5,051,430. Silver bullion purchased under the act of 1890 on hand November 1, 1896, was 125,061,263 fine ounces, which cost the government \$112,865,625. The coinage value of this amount is \$161,693,000.

The Volkland of the Transvaal has passed two laws that are apt to stir up considerable opposition and may cause trouble if enforced. These are the press law and the expulsion of aliens bill. By the press law it is enacted that in future all articles appearing in Transvaal newspapers must be signed by the writers, and any newspaper can at once be suppressed by the president and executive council should they deem it obnoxious to the state; and by the expulsion of aliens bill the president and executive council have the power to summarily put over the border any burgher or Uitlander making himself politically obnoxious to the state. It is claimed that both of these laws have been passed in defiance of the constitution.

The Tyranny of the Desk.
We will suppose that your occupation is sedentary—that you are chained, so to speak to the desk in some counting house or perhaps to the loom in some vast mill where you are compelled to labor from morning to night. Sunday is your only day of relaxation. You return home every evening weary mentally and bodily. Your health and strength begin to fail. What will most effectively recuperate your vital energy? The weight of evidence points to no other conclusion than that Hostetter's Stomach Bitters is your sales' most reliable sheet anchor. Use it persistently, and your system will soon regain its pristine vigor. Every function will receive a healthful impulse. There is no remedy to equal the Bitters for nervousness and want of sleep, dyspepsia, constipation and biliousness. It averts and remedies all forms of malarial disease, and is a preventive of leucemia and neuritis.

The National Matte Smelter.

A practical and simple method of smelting sulphide ores, such as nickel, copper, gold and silver ores. In localities where lead ores and fuels are scarce and almost unobtainable, our pyritic water jacket Matte Smelter has been recognized with highly satisfactory results, and has been thoroughly tested on various pyritic, sulphide and arsenide ores, in capacity of 2 to 25 tons per day. It is the most practical, cheapest and simplest method of gold and silver ore smelting and concentrating that is known today.

It requires no extraordinary skill, no lead ores, no fluxing material, and no fuel of any kind for the smelter after it is started. The sulphur in the ore is its natural fuel only, and its cost has no comparison with any other process of concentrating.

We are prepared to furnish any size or capacity plant complete to substantial mining people, set it up and furnish our men to run it for them on easy payments. Price and specifications furnished with references and testimonials on application.
